4-6 years

1 child / 1 adult

A SIMPLE, FUN GAME TO RECOGNISE COLOURS.

Contents: 1 answer board, 5 answer tokens, 20 double-sided cards.

Object: To identify the colours of the 5 animals who are frolicking on the cards.

Preparing to play: Place the board in front of the child and go through the names of the 5 animals and the 5 colours with her.

Bird

Cat

Fox

Penguin

Bear

Yellow

Orange

Pink

Blue

Red

Principle of the game: The 5 animals are featured on each card. Each is represented in one of the 5 colours from the board.

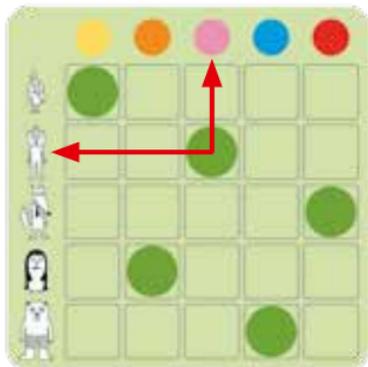

The aim is to identify which animal is which colour.

For example, on this card you can see:

- The cat: PINK
- The bird: YELLOW
- The bear: BLUE
- The penguin: ORANGE
- The fox: RED

The child positions the answer tokens on the board according to the colours of the animals featured on the card.

How to play:

The child chooses a card that she places in front of her and the adult then asks the following questions:

- What colour is the cat?
- What colour is the bird?
- What colour is the bear?
- What colour is the penguin?
- What colour is the fox?

When she thinks she has identified the right colour for an animal, she positions the answer token in the table. To do so, she will have to follow the row of the animal in question and position the token in the box of the column of the colour identified.

As soon as she has completed the table for all the animals, she can turn the card over to check if her answers are correct!
